At 40-50% less
than other
binderies!

- Bindings Guaranteed for Life
- Custom Leather Covers
- Restoration of Your Treasured Heirlooms

We usually have
our Bibles and
books done within
two weeks.

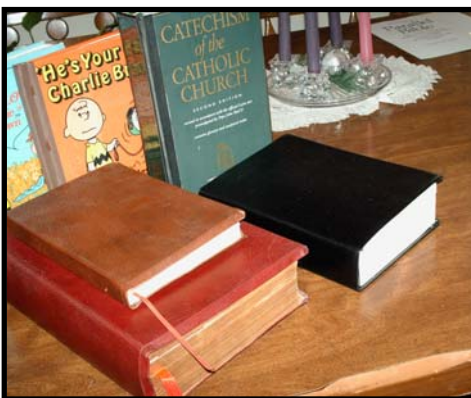

“Permatized” “Super Margin Saver,” guaranteed for life, “hard” binding -- Will never come apart! This binding uses the least inside margin of any binding method in the industry. “Soft bind” is recommended for books/Bibles with no extra inside margin. In both methods we actually extend the spine of the book/Bible to provide extra support for the rebinding. We use no imitation or “bonded leather” of any kind! We also use a heavy duty cover hinge material, not the “cheese cloth” other binderies use. Your covers will *never* come off! We never use hot glues, only water based glues (though it takes much longer to dry) for the reinforcement of the binding and spine.

The Repair Shop... waiting for the glue to dry on the spines of three personal size Bibles and one Family Bible. The next step will be to measure the Bibles and to cut the leather for the covers. How one makes a cover depends upon if its an “Old Style” or a “Modern Style” cover.

The covers have been attached and the satin strips have been placed to cover the cover hinge material. Cover inner liner and fly leaves are now ready to be glued into the Bibles.

Put a hard cover on that important paperback book or repair a child’s classic.

Note the *small beveled edged*, Modern Style black leather Bible.

Note the *larger beveled edge*, Old Style on the Personal Size and Family Bible

For services and prices see our order form on page three. Download the form and send with your book or Bible!

“Joyfully serving your re-binding needs for over 25 years”

Preparing and Restoring a Family / Pulpit Bible

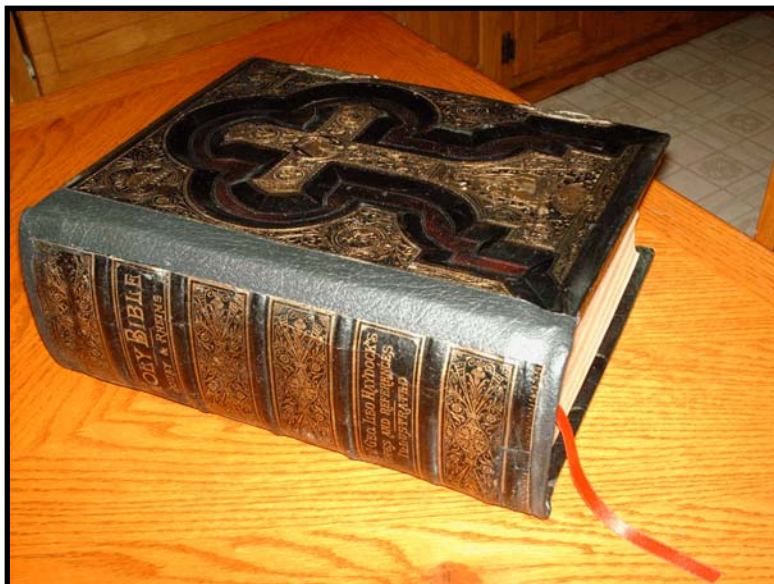

Covers must be removed; Loose pages are repaired and re-attached; All loose leaves must be re-glued and the Bible clamped for a drying period; New ribbon is placed; Cover hinge material and spine reinforcement must be applied and allowed to dry;

Old Spine Cap must be stripped of its backing materials; Soft corners on covers are saturated with a hardening agent and left to dry; Gouges and missing cover leather are filled in and left to dry;

Covers and old spine cap are re-dyed and dried; They are then sealed and dried before they are finished; A new genuine leather Spine Cap is cut and attached to the refinished covers; The covers are then mounted onto the Bible cover hinges with a contact cement; Inner cover work includes a satin strip over hinge area in both front and back, and fly-leaf pages are added if necessary.

The final step is the attachment of the old spine cap piece onto the new leather spine cap with contact cement.

Soft Leather Cover Bible Replacement and Spine Rebinding

Super Margin Saver permanent hard binding uses the least inside margin of any method in the industry! Super Margin Saver soft binding uses no extra inside margin. Recommended for new books and Bibles and those with little inside margin. In both methods we actually extend the spine of the book/Bible to provide extra support for the rebind.

We also use a Heavy Duty cloth cover hinge material, not the "cheese cloth" used by other binderies. Your covers will never rip from your book/Bible. We use only top quality Genuine Leather. No bonded leather or imitation of any kind.
